

Introducing Video Monitoring

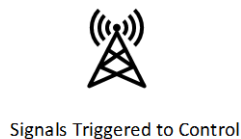

Add monitored surveillance cameras with local Video Verification services to deliver a pro-active security solution. With Video Verification our control room verifies alarms on your property. This reduces damage to your property and results in faster police response to alarms.

- ▶ Update your security system with a monitored camera or value add from your existing cameras
- ▶ Your control room takes care of your site, performing remote live intervention and triggering priority police response when an intruder is confirmed
- ▶ Your control room provides an on-going pro-active service by verifying the connection each week to ensure your system is operating effectively

Video Verification

Get more peace of mind by adding valuable video monitoring services to your intrusion alarm system.
